About me

I am Ostap Klysa, a web developer from Porto, Portugal. I am passionate about technology, art design and above all I love coding and develop new projects. Some of the tools I use to express myself through coding are **HTML**, **CSS/SASS**, **JavaScript** but I am always searching and learning new technologies to improve myself. I have experience designing and developing Web applications from **backend side**, using **Laravel framework** with a powerful CMS called **OctoberCMS**, to the **frontend side** using mostly web tools and frameworks such as **HTML**, **CSS/SASS**, **JavaScript**, **Bootstrap**, to name a few.
